Task 5 写作范例

Dear Sir or Madam,

I believe that students should help with housework at home. My reasons are as follows:

**At first**, doing housework helps us to understand our parents better. I think children shouldn't expect their parents to work hard outside and do all the chores at home. **Besides**, doing chores helps us to develop independence and learn essential life skills. **Last but not least**, I disagree that students should spend all their time studying. It's our duty to share some housework because we are members of our family.

**For instance**, I often help with housework at home. Doing housework does not take up much of my time. Instead, I find it a good way to relax after a whole day of studying.

**All in all**, I believe it's important for students to help with housework at home. We should try to find a balance between our studies and household responsibilities.

Yours truly,

Anna
